Mr. Trego announced the death of the Hon. Daniel Webster, a member of this Society, who died at Marshfield, October 24, 1852, aged 71:—and, on motion of Dr. Harris, the Rev. H. A. Boardman was appointed to prepare an obituary notice of the deceased member.

Mr. Trego also announced the death of Mr. Isaac Wayne, a member of this Society, who died on the 25th ult., aged 83.

Mr. Trego exhibited to the Society some mineral specimens procured by Dr. Hammond, of the U. S. Army, from a volcanic region in New Mexico, between the waters of the Rio del Norte and the Gila, on the Pacific slope. Among them are specimens of garnets; beautiful for their fineness of colour and excellence of composition.

Dr. Hammond says, that in that part of New Mexico, the common potato (*Solanum tuberosum*), grows abundantly in a wild state, and is apparently indigenous in that region. Some of the tubers from this native growth have been sent to the President of an Agricultural Society in New York, for experiment in planting.

Mr. Henry D. Gilpin, on the part of Mr. Cogswell, librarian of the Astor Library in New York, stated that the Library has duplicates of the early volumes of the *Transactions* of this Society, which they would be glad to exchange for the *fourth*, and all after the *sixth* volume of the New Series:—which, on motion, was referred to the Librarian of the Society, with power to take order. Mr. Gilpin further reported the satisfactory condition of the Astor Library, which he had recently visited.

The Society then proceeded to the adjourned election of members:—when, on the proposition of two of those who had nominated No. 284, the balloting for that nomination was postponed until the meeting for election in January next.

The pending and new nominations were read.

All other business having been concluded, the ballot box was opened, and the following named gentleman was declared by the presiding officer to be duly elected as a member of the Society.

Lieut. M. F. MAURY, of the U. S. Navy.
